

PROFILE SUMMARY

Full Stack Developer with hands-on experience in **Core Java, Spring Boot, and Microservices-based application development**. Skilled in designing and developing scalable REST APIs, implementing JWT-based authentication, and integrating frontend and backend systems.

Experience in building **real-time applications using WebSockets**, working with **PostgreSQL databases**, and testing APIs using Postman. Strong understanding of **microservices architecture, API communication, and system design fundamentals**.

Passionate about writing clean, maintainable code and building high-performance applications for both web and mobile platforms.

TECHNICAL SKILLS

Frontend Technologies Angular (Basic Knowledge),React.js, Next.js , HTML, CSS, JavaScript	Backend Technologies Java, Spring Boot, RESTful APIs, Microservices Architecture,	Database PostgreSQL,Query Optimization
Authentication & Security OAuth 2.0, JWT Authentication	Tools & Platforms Postman, Git, JUnit	Messaging & Real-Time WebSockets , Basic Knowledge of Messaging Queues (Conceptual – Solace/Kafka)

PROFESSIONAL EXPERIENCE

Software Developer

Agaram Technologies, Chennai
June 2025 – Present

Backend & Microservices Development

- Developed scalable **RESTful APIs using Spring Boot** following microservices principles.
- Designed modular backend services for better scalability and separation of concerns.
- Implemented **JWT-based authentication and secure session handling**.
- Integrated APIs with frontend systems ensuring efficient communication.

Microservices & Real-Time Systems

- Built **real-time chat system** using Spring Boot and WebSockets.
- Enabled features like messaging, unread indicators, and live updates.
- Designed services to handle asynchronous updates and event-driven behavior.

Database Management

- Designed and optimized **PostgreSQL database queries**.
- Implemented **OTP generation systems** and dynamic data binding.
-

Notification & External Services

- Integrated **Twilio APIs** for SMS and WhatsApp notifications.
- Communicated with external services via REST APIs.

Real-Time Systems

- Implemented **WebSocket-based real-time updates** for Kanban boards and task management systems.

AI-Based Context Search Implementation

- Designed and implemented **semantic document search using Ollama LLM embeddings**.
- Integrated **pgvector extension in PostgreSQL** for storing and querying vector embeddings.
- Developed **Spring Boot APIs for similarity search using cosine distance**.
- Improved search accuracy by implementing **embedding-based ranking instead of keyword-based matching**.

Mobile Development

- Built cross-platform apps using **Flutter**.
- Integrated APIs and managed application state efficiently.

PROJECTS

Web Phishing Detection using Machine Learning

Jan 2024 – Apr 2024

- Developed a machine learning model to detect **phishing websites**.
- Extracted features from **web content and traffic datasets**.
- Trained classification models using **XGBoost and Naive Bayes algorithms**.
- Built a web-based interface for **real-time phishing detection**.

EDUCATION

B.Tech – Information Technology
Meenakshi Sundararajan Engineering College
2020 – 2024

CERTIFICATIONS

- Python Full Stack Development – Besant Technologies (2024)
- Python 100 Days Bootcamp – Udemy (2024)
- Data Structures and Algorithms – Great Learning

Languages Known:

English,Hindi,Tamil
